

## Magnetic system MS

### Designation

Magnetic system is designed for cleaning mud from small metal objects with ferromagnetic properties. Magnetic system consists of stainless steel tube with permanent magnets inside. The tube may be mounted to handle or rack.

Type	OD, mm	System capacity, kN	Length, mm	Height, mm	Width, mm	Weight, kg
MS-1	25	2,5	455	180	-	3
MS-2/3	35	7	455	400	-	10
MS-35	35	2,5	490	60	70	3
MS-90	90	20	500	125	150	15

### Identification example:

#### Handle mounted

MS – 2/3

MS – magnetic system

2 – design feature

3 – magnetic tubes count

#### Rack mounted

MS – 90

MS – magnetic system

90 – magnetic tube diameter

Operating parameters are typical for the bit type specified in general applications. For recommendations on your specific application, please contact a “BURINTEKH”, Ltd representative.
